

International Cell Phones

Before catching your flight to Canada, contact your local cell phone carrier to get information about special pricing plans for calls, text messaging and Internet usage outside your home country. If you use a smart phone, ask your carrier about certain settings such as "Turning Off Data Roaming" that may help you save money on usage. Where ever possible, use available wireless provided by your hotel or various venues near the Air Canada Centre.

Here are some handy links for US Carriers:

Verizon Wireless
